

Black on white – the price is right

The Polaris 3 has a good grip in snow. This is the ideal tyre for economical drivers since its low wear ensures a high mileage performance and its low rolling resistance results in reduced fuel consumption. "Snow catchers" in the tread keep the snow in the groove, making it possible for the Polaris 3 to transfer the power of the engine to the snowy slopes when accelerating and provides an excellent braking performance.

Good tyres. Good deal.

Polaris 3 – Good grip in snow

Rolling resistance

Feature

- Additional groove in the shoulder lugs

Effect

- Reduction in tension within the tread

Benefit

- Low rolling resistance, resulting in reduced fuel consumption

Braking in snow

Feature

- „Snow catcher“ along the longitudinal grooves

Effect

- Good grip in snow, snow catcher stops the snow from slipping through the groove

Benefit

- Optimised setting-off and braking in snow

Mileage Performance

Feature

- Sipes of different depths at an angle to the lug edge (lateral to snow)

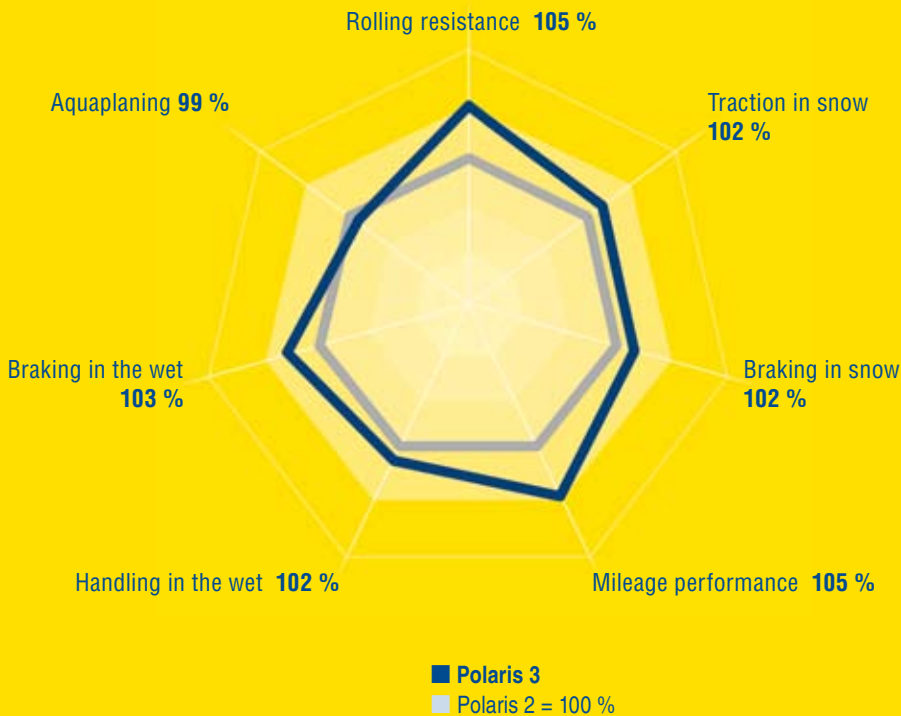

Effect

- Optimised distribution of stiffness within a lug element

Benefit

- Low wear means high mileage performance
